Timber Wood Protection Solutions

FORWOOD

Issue 1

ForWood – July 2012

Welcome to the new issue of ForWood.

The Forest Industry Profile 10 was launched by Senator Joe Ludwig on 28th June. The Profile provides a snapshot of the industry's economic contribution, as well as its environmental and social performance. Whilst the industry has faced challenges in recent years, the Profile highlights the industry's resilience and its ongoing contribution to the Australian economy. Forestry is a great Australian success story and the Profile is a tool to help us tell that story. Read more about the Profile launch in the Industry News section below.

The Wood Solutions Profile 10 complements the Profile 10 and provides specific information on the wood products sector. It includes information on the value of the sector, its contribution to employment, and the environmental benefits of wood products. Wood Solutions Profile 10 is available for download from the Wood Solutions website
